THANK YOU FOR BEING HERE

We're fighting for **Term Limits, Ranked Voting**, and **Equal Rules** to give outsiders a fair chance to compete with corrupt career politicians.

80% of voters are already demanding these exact reforms – so we don't need to convince anyone about anything they don't already know.

We have a 100% foolproof plan to solve ALL our nation's problems - that doesn't depend on a sudden wave of integrity flying over Congress or unicorns showing up at your front door.

Pass this message on to anyone who is still emotionally stable enough to hear the news and not test the structural integrity of their drywall.

But most important, Join Reset America - before the only thing left functioning in Congress is their self-granted absolute immunity that protects them from crimes that would send any of us to prison.

Reset America isn't about anger...
It's about believing again.

Let's hear it...

- Your feedback won't hurt our feelings.
  We gave those up around the same time Congress gave up integrity.

Please tell us...

- What you *love*
- What you *hate*
- What confuses you
- What excites you
- What keeps you up at night

You may also...

- Suggest new sections.
- Offer ideas that will make this message stronger.
- Add concerns, edits, or full-blown rants.
- Join Reset America. Stay calm, be present, and Let the Revolution Begin!

What the Media Gets Wrong

The left blames the right, the right blames the left,
and the rest of us are left blaming ourselves
for believing that any of this shit makes sense.

Who Controls your Thoughts? (it's not you)

The two biggest forces that shape how we think are (1) the politicians who run the system and (2) the media that filters everything we see. And neither one is looking out for us.

Both groups are owned, financed, and controlled by groups with their own agendas – and keeping you confused, angry, and divided is their business model. Once you understand who they really answer to, the strategy becomes impossible to ignore.

They're only Looking out for Themselves.

Most political conversations focus on the scandals, the headlines, the manufactured outrage of the week. But all of this are just symptoms of a larger problem… we are electing people who don't represent us.

Their loyalty isn't to the voters – it's to the donors, lobbyists, and special interests who fund their campaigns and keep them in power.

Stop Wasting your Time.

This is why we don't watch the news anymore. Why should any of us waste our time? The news doesn't inform us – it agitates us. That's the business model. It's the same recycled garbage designed to keep us dumb, angry, and distracted. Worthless noise. Manufactured outrage. Performative screaming.

I'm done going along with the scam.

I'd rather focus my anger and resources to solving our issues - and not just bitching and stressing out. This is just one simple example of how Congress puts their benefactor's interests above yours.

A stressed-out population has great benefits to Big Pharma – which has 2 lobbyists per rep. They don't want you happy and living within your means. They want you broke and troubled, because that's what brings in the cash.

Media + Congress = Money & Power.

And the two parties know EXACTLY what they're doing. It's a circus designed to keep you distracted while the people in power rob you blind.

Every headline is just bait to keep us arguing about pointless bullshit to keep us divided. Division is their business model. If Americans ever stopped fighting each other long enough to look up, we'd notice who's actually screwing us – and their whole racket would collapse.

The Past doesn't Matter. It's Time to Move on.

And honestly, we don't give a shit how this mess started or which party screwed it up first. None of that matters when the foundation itself is broken. Nothing will change if we keep re-electing the same two parties and the same career politicians who caused this disaster in the first place.

Fix the System or Nothing Changes.

Until the system works, the issues don't matter. It's futile to debate any issue until we fix the core problem. We can argue about healthcare, immigration, foreign policy, taxes – all day – but it's pointless if the people making those decisions aren't actually representing us.

We're Asking the Wrong Questions.

It's frustrating to watch the news and see all the attention focused in the wrong direction. We MUST stop getting direction from the media and start thinking for ourselves.

When we think for ourselves, we think one way… but when we think on behalf of society, we think the complete opposite.

This is covered in detail in our book, Mistaken Beliefs (our gift to you when you join Reset America.)

The Big Picture Is Ignored (on Purpose).

The media talks about the symptoms of our problems, but they ignore the disease. The level of "getting to the root of a problem" is a three when it should be a 10.

They don't talk about what's most important like the motivations or intentions behind issues. They only report on trivial topics, like what Trump lied about today. Look, we know he lies. Even his supporters know he lies. How the hell is this news?

Here's another example. Trump just submitted a motion for an appeal. The news is analyzing the merits of the arguments. But the goal of the motion is not to get a win or even make a legal point. He just wants to delay the trial, so he needs to invent reasons to justify his excuses.

Daily Bullshit Buffet - Grab a Plate!

It doesn't matter what those arguments are. They are just made-up, but the news and podcasters only focus on the details, which are meaningless. There needs to be more news coverage about what is preventing this change… which we all want and know that we need. Transformational change. Not fake incremental change. This is the most important issue. Period.

We only need a Few Outlets to Ignite this Movement.

Fortunately, we only need a few outlets to begin covering Reset America and our plan. Once the media – and people in general – hear what Reset America is about, this message will spread faster than Congress running from a lie-detector test.

Issues that Frighten them.

These are the issues that actually matter – not the circus, not the drama, not the clickbait the media shoves down our throats. These are the real questions the politicians pray you never ask and the media refuses to touch, because their sponsors would panic and need a fresh pair of pants.

I'm done being lied to, distracted, and shoved into fake left–right fights. If we don't force *these* into the national conversation, nothing changes – and the same corrupt machine keeps winning

Election Structure & Fairness

- Gerrymandering
- Signature requirements designed to block challengers
- Debate exclusion rules
- "Spoiler effect" that traps voters
- Ranked-choice voting suppression
- Laws written by incumbents that protect incumbents

Copyright (c) 2025-2026

Corruption & Incentive Systems

- Donor influence on policy
- Lobbyists writing legislation
- Conflicts of interest
- Dark money loopholes
- SuperPAC coordination

How the Political Machine Truly Works

- Real consequences of a two-party monopoly
- How is the system rigged and what we can do about it?
- Why incumbents win 95% of elections?
- How do committees decide which bills live or die?
- Why certain bills never reach a vote?
- Why do term limits never come up?

How Voters are Manipulated

- Manufactured outrage cycles
- Emotional triggers in headlines
- Selective polling used as persuasion
- Outrage algorithms
- Artificial polarization
- Fear messaging from both “sides”

Other Topics the Media Avoids

- Real reform proposals (RCV, term limits, ballot access reform)
- Anti-corruption mechanisms
- How other countries run elections?
- How a small number of independents could break the gridlock?
- Why are people afraid of change?
- How our election process evolved in a way that allowed- the 2 parties to nominate the two most disliked party nominees in US history?
- What are the unconscious variables that affect our decisions, i.e., confirmation bias and herd mentality?
- How to recognize it and deal with Practical ideas to fix our problems and why these are not even considered.
- How could Donald Trump win the Republican primary (in 2016) with only 8.4% of the vote, and what can we do about this?

The Division Game Is Over.

The two parties and the media need us divided. This is not accidental – it’s a strategy… and sadly for us, it’s working flawlessly. If Americans ever stopped tearing each other apart long enough to look up, we’d see exactly who’s been screwing us, and their entire operation would collapse by lunch.

Divide-and-Conquer Ends Now.

I’m done going along with their scam. I’m going straight at the root cause – the one thing they pray we never do.

Not too long from now, our children will inherit this mess, and I’ll burn their whole fucking playbook to the ground before we let them grow up in this broken system these clowns created and protect.

Launching The Big Picture Podcast

We are launching a new podcast called, The Big Picture. This is where we step back from the self-interest and talk about what’s really going on underneath it all. Not the headlines, not the daily chaos – the root cause that drives everything else.

It won’t waste your time on the symptoms. It will focus on the big-picture truths the media won’t touch. Because if we don’t fix the root of the problem ourselves, nothing else even matters.

We're not Picking Teams… we're Fixing the Game.

Reset America is non-partisan. We're not taking positions on left-right issues, and we're not getting dragged into a culture-war. The Big Picture Podcast is about the system – the rules, incentives, and structures that determine who gets elected and who they actually listen to once they're in office. Fix that, and everything else becomes possible. Ignore it, and nothing changes.

The Unity they Feared is Happening Right Now.

Here's the truth: nothing changes unless we stop letting the parties and the media split us into 2 opposite teams. "Unity" isn't some feel-good slogan – it's literally the only way out of this mess.

Underneath it all, We want the Same Future

When Americans think for themselves (instead of thinking how the 2 parties want) we realize that WE ALL want the same basic things: fairness, honesty, accountability, and a system that actually represents us. Wouldn't that be better?

This Movement isn't Left or Right … it's Forward.

This movement is for the millions of people who are sick of being manipulated, sick of being divided, and sick of fighting each other instead of fixing the real problem. If we stand shoulder-to-shoulder instead of toe-to-toe, the two parties don't stand a chance.

We either Fix this Together … or Not at All.

If we don't work together – all sides, all backgrounds – nothing changes.
If we do? Everything changes.

Attention Celebrities & Influencers: Welcome to the Guilt Trip

You are in a unique position to educate the public. We constantly hear celebrities, commentators, entertainers, business leaders – even politicians – complaining about our corrupt, divisive two-party system. Well, this is your moment to do something real.

If you've ever joked, complained, or ranted about our government, now is the time to turn frustration into action. Just a few public endorsements would be enough to ignite this movement and launch this message into orbit.

Forward this Message before they Shut us Down.

Forward this message before they silence the only movement fighting for every American – including your family. Share it with anyone who's tired of being lied to: reporters, creators, musicians, influencers, neighbors, friends. Every voice matters right now.

We're ready to launch the second the funding is in place – the plan is built, the team is ready, the structure is done.

Stop Throwing your Money Away. Fix the Root Problem Instead.

And here's the truth: donating to anything else - any party, politician, or cause - just keeps the same broken machine running.

Until we rebuild the foundation, every dollar spent on symptoms is wasted. So please, redirect even a small piece of what you normally donate elsewhere, and help fix the root problem so future generations don't inherit a broken system.

Einstein said it best: "Insanity is doing the same thing over and over and expecting different results."

How are we being any different?

Copyright (c) 2025-2026

Timing is Perfect to Start a New Party

We fought a Revolution against a Monarchy for Independence -
now we must fight against our 2 parties for Freedom.

This is a truly Unique Opportunity to take back Control of our Government.

Right now, there's a once-in-a-generation opportunity for third parties and candidates.

Congress is effectively split, which forces their members to vote how they are told. This presents a unique opportunity for independent candidates.

Just a few independent members can have the swing vote in nearly every partisan decision. Then, we alone would determine the next Senate Majority Leader, House Speaker, committee members, chairmanships and much more.

We can use this power to pass our first three goals; Ranked Voting, Term Limits and Equal Campaign Laws.

It is our desire to build a coalition with a small number of intelligent, serious candidates who would like to run for national office under a new party, perhaps the Reset Party.

By having the deciding vote on every close bill, we would be able to negotiate extraordinary terms for the residents of their respective states.

This is real power that is currently not available to the residents of their states and is not possible with current Democrat and Republican legislators.

Who are the "Crazy" ones?

Candidates who belong to one of the 2 parties are considered to be "legitimate candidates", yet they are the ones who sell us out to stay in power.

But 3rd party candidates – who are looking out for you – are called the "Crazy Ones." Can someone please explain this?

In 2006, Mike Jingozian was persuaded by many people to run for President. (Yes - peer pressure got the best of even him.) But as soon as he did, the same people called him "crazy" for doing so.

This is why so many independent candidates enter races and then step out, just to step back in. And, due to this uncertainty, the candidate appears foolish and unreliable in the eyes of the public. This is not because of the candidate's indecision. It is the result of voters not thinking for themselves.

When you're not running, people encourage you to enter the race, but, as soon as you do, the same people say you're "crazy".

This is because when we think for ourselves, we think one way, but when we think on behalf of the herd, we think another.

Many of these unconscious psychological pressures are covered in the book, *Mistaken Beliefs.*

If you disagree, let us remind you that 80% of Americans want term limits, but they re-elect the same corrupt politicians over 95% of the time… with record low approval ratings!

This is herd mentality engineered by the 2 parties to stay in power… and it works magnificently!

Who are really the "Crazy Ones?"

1. Voters who fight for your rights or
2. Voters who re-elect the same politicians over and over, and hoping that they suddenly start doing the right thing and expecting unicorns to show up at their front door.

The High Cost to Bribe and Mislead the Public.

Independent candidates have one more advantage… we don't need to raise much o run a successful campaign.

The amount of money that 3rd parties spend per vote is a fraction of what the 2 major parties need to spend to bribe and mislead voters.

These figures are from 2016.

- The average cost per vote for a 3rd party candidate was under $3.00.
- The average cost per vote for a two-party candidate is hard to know. The amount of money spent that is reported is about $20-25 per vote.

  However, this figure does not include dark money which is now in the billions. The total amount spent is somewhere between $20 – $100 per vote.

Apparently, it costs much more money to run a campaign if you lie and cheat.

Your Money goes a Long Way.

Imagine if you gave 3rd parties just 1% of the money you contribute to the 2 parties.

With this tiny amount, independent candidates can spread their message to our entire population. Then, you can take the remaining 99% and spend it on buying Congress a conscience… express delivery!

This is the greatest threat to the Democrat and Republican parties and the biggest opportunity for the American People.

They're Laughing at us Right Now.

They're reading this message and saying there's no chance that this is going to take hold because the American People are too stupid, too distracted, and too lazy to vote us out.

They have no need to worry.
Their story that "voting for a 3rd party is a wasted vote" is working brilliantly.

Suing Congress and the Two Parties

We are Suing the 2 parties for blatant Conflicts of Interest against our Constitution and the American People.

What is Conflict of Interest?

> "The basic criminal conflict of interest statute, 18 U.S.C. § 208, prohibits government employees from participating personally and substantially in official matters where they have a financial interest."

A conflict of interest occurs when an individual's personal interests – family, friendships, financial, or social factors – could compromise his or her judgment, decisions, or actions in the workplace.

Reset America vs. The US Congress

Along these lines, we are creating a Go Fund Me campaign to raise funds to sue Congress for blatant violations of conflict of interest against the Constitution and American People.

The foundation of our Constitution is built on maintaining balance of power and prohibiting conflicts of interest.

Yet, the laws that affect Congress are written and passed by the members of Congress themselves... making this the greatest conflict of interest in the history of our nation, and perhaps the world.

When our Constitution was written, there was no word for "career politician". It was never considered a possibility that someone would serve in government for more than one term.

Whether you are a strict constitutionalist or not, you must agree that the law is on our side.

This is taken from our book, Mistaken Beliefs (written about decade ago.) Take for example Senator Joe Manchin (Democrat). He was recently chairman of the Senate Committee on Energy. This is the top position in ensuring we pursue more climate-friendly policies - and he is adamantly against addressing global warming.

Do you think that it has anything to do with the fact that he owns a coal company, Enersystems, and last year alone, he was paid $492,000. Or that he receives the most funding in the senate from the oil and gas industry?

Here are the different types of conflicts of interest that apply to our case.

1. Absolute Immunity
2. Election Laws
3. Fundraising
4. Personal Benefits

---

1. Absolute Immunity

Congress gave themselves absolute immunity from being sued or prosecuted. This means that no member of Congress can be brought to justice for actions that we would be convicted for.

Copyright (c) 2025-2026

This protection is broader than just "qualified immunity" which is what you may already be familiar with, for example police. Here are some of the crimes that fall under absolute immunity.

They openly violate their own laws and oaths.

- They ignore subpoenas & court orders.
- They hire family members and people unqualified to do their job.
- They use fake and biased data.
- They hold financial interest in matters before the legislature, i.e., insider trading.
- They have outside income interest.
- They receive gifts and honoraria.
- They disclose nonpublic info for personal gain.
- They use public funds and employees time to run campaigns.
- They don't follow standard accounting rules when determining data like: unemployment, GDP and the debt. If we use the same accounting practices that Congress uses then we would be in prison for life.

But since **both parties** violate these rules, neither party objects.

2. Election Laws

The 2 parties create steep hurdles that prevent the names of 3rd party candidates from appearing on ballots. Many of these are illegal. Here's one example.

Gathering signatures is hard work and the 2 parties know this. This is precisely why they require an unreasonable number of signatures just to get the names of candidates on ballots.

What's more, the number of signatures required by 3rd parties can be up to 10 times more than those required by the Democratic and Republican Parties. Are you okay with this?... because we're not!

In addition, people are scared to give out their personal information to strangers at a time when cyber-crime is exploding. And if just one signature is wrong, then the entire sheet is thrown away. Who is this meant to benefit?

3rd parties are constantly suing states and the federal government to defend against illegal campaign practices that prevent competition. Over the past 10 years alone, there have been over 100 lawsuits brought by 3rd party and other independent groups.

These cases are seldom lost, but most are thrown out by judges whose careers are influenced by their decisions since they were appointed by Democrat and Republican governors.

But after collecting signatures and suing the government, there are no funds left for the important activities that the Democrat and Republicans take for granted, like fundraising, promoting candidates, outreach, candidate development, volunteering, media development and so on and so on.

3. Fundraising

Every year, the 2 parties give the super-rich more ways to buy their influence. There seems to be no limit to how much they will sell you out for their own benefit.

The cost of re-election campaigns (for "both sides") is skyrocketing – so both parties must raise even more money to keep up with fundraising from their opponent. Of course, this means selling out our nation even faster.

Fundraising regulations are a maze of loopholes that can be interpreted different ways depending on which rules are exploited by which party.

Copyright (c) 2025-2026

For example, the limit that one may contribute to candidates is $3500 per election, On the other hand, one individual (Elon Musk) gave Trump $250 million. If you can't explain this, then you're not alone.

The Supreme Court case, Citizens United, removed all limits on how much one can donate to campaigns and opened the door to unlimited dark money.

Now, the superrich can spend funds to influence elections without voters even knowing where the money came from. Are you okay with not knowing who is paying to buy your vote and how much?

4. Personal Benefits

Congress has the easiest job in the world. They don't hold real jobs. They don't struggle to make ends meet. They don't sit in traffic. They don't get searched in public places.

They make a minimum of $174,000 a year and get paid while campaigning.

They pass laws that exempt them from accountability to personal responsibility.

- They aren't held accountable when they leave office for the terrible policies and have no consequences when they spend money we don't have.
- They have zero oversight or accountability.
- They have no performance reviews or checks and balances of any kind.
- They get a generous expense allowance that covers everything from first class air travel to free access to elite gym memberships.
- They travel around the world with family and friends, paid for by debt spending.
- They're given gifts, meals, attendance at events and vacations from lobbyists.
- They get outstanding life and health insurance and free out-patient care.
- They get full life-time retirement benefits after just five years of service with a premier retirement package that extends much farther than social security.
- They have a 2 day work week. Members of Congress typically arrive in Washington on Tuesday night and fly home Thursday evening.
- They get free printing and postage for sending mass mailings to voters and full-time staffs who are dedicated to win re-election campaigns.

Can you think of conflicts of interests that are more blatant as these examples?

If you are an attorney practicing government law, then please contact Mike Jingozian at 503-805-7333. We need your advice.

Nothing is more important than choosing how we wish to be governed,

but currently, our political system is controlled by corrupt career politicians whose only objective is to stay in power.

Copyright (c) 2025-2026

Lie Detector Tests that Reveal the Truth

Just because a Politician Says Something…
it doesn't mean they Believe it for Themselves.

Saying Something vs. Believing Something.

A politician says something controversial and suddenly it's all over the news. The media then wastes an absurd amount of time analyzing what they said – the pros and cons, the scandal, the "position," the outrage of the week.

But none of that actually matters. What a politician says has almost nothing to do with what they truly believe.

The truth is, we have no idea what any politician really believes. All we know is who paid them to take the position they're repeating.

It's never about what they say…
it's about why they're saying it.

Politicians will never risk jeopardizing their precious revenue stream. So debating their "positions" is pointless. Their arguments aren't based on facts or principles – they're crafted to please the sponsors and benefactors who keep them in office.

How can we expose their hypocrisy?
Let's put them to the test.

Let's ask politicians (that you select) to answer a few specific questions. We'll give their favorite charity the amount that you donate here.

If the politicians pass a lie detector test, then their charity collects the money. It's absolutely free to the politician but this forces them to take the test since otherwise they're denying their favorite charity this money.

We can ask them questions like these:

- Will you support a bill for term limits?
- Do you think that the two-party monopoly is really working?
- Is our nation's democracy heading in the right direction?

For example, you can…

- Ask any sitting Republican if Trump is honestly qualified to be president?
- Ask Trump if he lost the 2020 election?
- Ask Pam Bondi if she thinks that Trump is guilty of crimes?
- Ask Linda McMahon if she is really qualified to be Secretary of Education or was this appointment payback for favors?
- Ask Ted Cruz if he really believes that global warming is fake or does he take this position only because he's the largest receiver of money in the House from the oil industry?

Tell us which questions we should ask which politicians. Leave a comment and we'll add your requests here.

Candid Letter to Congress

If you care about America (like you say you do),
then you know this plan is truly our only legitimate course of action.

To the Honorable Members of the United States Congress,

We write to you with profound respect for the institution you serve – and with an urgency that reflects the gravity of this moment.

Our nation is facing a structural crisis that cannot be addressed by rhetoric, party victories, or incremental fixes.

Americans across the political spectrum feel that our system no longer represents them, and if we do not address the root causes of this problem, the fractures we see today will only deepen.

Enough with the pleasantries. I'm done pretending this dumpster fire deserves manners.

Dear Member of Congress,

I'm done being polite about it. The current two-party system is dog shit. It's outdated, unsustainable, and embarrassing.

Our nation and societal problems are exploding, and the consequences are catastrophic.

You know that all of this is true -- and if you don't agree, then you are either lying or you lack the basic ability to do your job. There is no third possibility.

Our System too Broken to Repair.

Oddly enough, this is good news - because systems this broken are easier to replace than to repair.

When a building collapses, you don't repaint the walls. It must be torn down so that it can be replaced with something exceptional.

How Washington Turned you into what You Swore you'd Fight.

You put your hand on the Bible and swore to uphold the Constitution. Then, overtime you forsake that promise for world of bickering, partisanship, and personal gain.

You may have gone to Washington with noble intentions, but after being engulfed in this depraved environment, the corruption rubbed off. It's okay to cheat and lie because everybody cheats and lies.

No one expects you to admit that our two-party monopoly (which you are a part) is at fault. And, as a member of the monopoly, you are -at a minimum- extending this crisis.

Do you have Courage to Admit the Truth?

Very few people have the courage to change a system that propelled them into a powerful and separate class.

We hope that you are among the honest few who know that we are not going to solve our problems by re-electing the same people and parties who created them in the first place.

Copyright (c) 2025-2026

The Monopoly you Pretend is a Democracy.

We expect some of your colleagues will **fight tooth and nai**l against a movement that fights for the average American at the expense of the special interests who finance your re-election campaigns.

But Facts are Facts.

Both parties pass laws that blatantly prevent competition. How else can you achieve a ridiculously high **95% re-election rate with a disgraceful 10% approval rating?**... unless you rig the system to stay in power.

You are literally breaking the **very same laws** that you created to prevent others from doing the **exact same thing** that you are doing right now. I've had enough and so have the American People.

You are always talk about how "competition is great for everyone". So why then do you intentionally prevent competition in our political system?

How you Stack the Deck.

A list of some of the unfair (and illegal) re-election advantages, that you have over 3rd parties, is contained here: www.ResetAmerica.com/documents.pdf.

Obviously, these are only what we know firsthand. There are certainly many more (which are better hidden from the public.)

We would very much like to know how you feel about not allowing fair competition in our elections.

- Do you (or any of your colleagues) feel guilty for rigging the system?
- Or voting to **give yourselves absolute immunity** which blocks you from heading to prison?
- Do you honestly believe that Congress should be able to **pass laws that affect yourselves?**
- Isn't that the **very definition of conflict-of-interest** and abuse of power?

Reset America is a realistic plan to get these changes approved by you.

1. **Term Limits…** to eliminate "career politicians".
2. **Ranked Voting…** to eliminate the spoiler effect so voters can vote for who they want,
3. **Equal Rules…** to give 3rd parties a fair chance to compete with career politicians like yourself.

According to polls, **80% of voters already want these changes**, so we at Reset America, don't need to convince them of anything new. We are merely offering voters a **guaranteed plan** to give them what they **already know** we need.

Our Foolproof Plan

1. Voters in Oregon elect Mike Jingozian to Congress. This is easier than it sounds.
2. He will introduce bill(s) to pass these three changes to our election laws.
3. You will ignore them. (We're hopeful but not delusional.) So, we sweeten the deal.

   Early supporters will receive better terms - so you are i**ncentivized to pledge your support early**… like phased term limits, more benefits, direct payouts and golden parachutes.
4. Then, we keep increasing these incentives until we have enough votes.

We only need a majority to pass. Not to mention, there are also many current legislators who already support these reforms, including **MOST** former members of Congress and **ALL** former US Presidents.

Copyright (c) 2025-2026

Here's the magic behind this plan. This strategy is **guaranteed to work since this is how all laws get passed.**

We hate to have to pay our "leaders" to do what's right, but this is the system that you bult. Regrettably, sometimes you must play the game in order to win it.

In times like these, leadership isn't measured by speeches, but by courage, moral clarity, and the willingness to do what is right even when it is difficult.

This is a rare occasion where self-interests and public interest merge - and where the reward for doing the right thing is immortality.

These reforms offer something rare: the chance to literally save our democracy, while relieving your guilt and protecting your own legacy.

All the same, there are enormous benefits (beyond financial) when you support this plan.

Benefits of Doing the Right Thing.

1. Prove your Courage and Integrity.

   Supporting these reforms sends a message that you are honoring your oath by upholding democratic principles and doing what's best for our future.

   It proves that you have the integrity and moral courage to fulfill your oath and do the right thing for the good of our nation.

   Without fair elections, we've already lost the foundation that makes elections matter.

   George Washington set the Bar - you Ducked under.

   George Washington voluntarily gave up power for the good of the nation. You can follow that example… and still be paid extremely well for doing so.

   Integrity isn't about yelling at the other side. It's about fighting corruption… even when you benefit from it - and putting the interest of the public above your own.

   Though, let's be honest, you'll be paid very well for selling us your vote, then literally doing nothing.

2. Seize a Rare Opportunity to fix our System in Crisis – while we still can.

   A missed opportunity today - is a regret tomorrow.

   We need to take advantage of this plan while we still have the opportunity. Rarely do leaders have the chance to save our country and protect our future simply by making our elections fair again.

   This plan will work – not because of the strategy alone, but because this message resonates with something deep inside every American who knows we deserve better.

   There's a sense of inevitability, a feeling that this moment is aligned and destined. Our Founding Fathers called these moments synchronicities.

   We are standing in one right now, clearly. And now you must choose the path you'll take:

   - Doing what you know is right, or
   - Protecting your source of power.

The Country is Watching your Next Move

Ask yourself this: What does it say that most former representatives and all former presidents only support term limits after they leave office? They know the truth – that elections are not fair.

They just didn't have the courage or integrity to act while they were still in power.

Either way, you won't be a member of Congress forever. You may as well sign on earlier (and receive special incentives) than later (and get none.)

3. Achieve Historical Recognition and Moral Redemption.

Every generation of American leaders faces a defining moment. This is yours. Want bragging rights for saving democracy? This is it.

We fought a Revolution against a Monarchy for Independence - now we must fight against our 2 parties for Freedom.

Let's remember the millions of people who sacrificed everything so that we can choose who we want to run our government.

Every life lost, every flag folded, every family that gave everything they had to give us the right to have fair elections.

Paul Revere didn't shout "The British are Coming" so you could shout "The Donors are Calling."

Passing these reforms isn't just doing what's right, it's a sacred obligation to these selfless patriots.

This is your once-in-a-lifetime opportunity to go down in history alongside our Founding Fathers who sacrificed their lives for our right to vote.

To dishonor their sacrifices isn't just negligence, it's disgusting.

100 years from now, when schoolchildren are studying history, will your name be on the list of those who saved democracy or those who caused it to die?

4. Decide how you Wish to be Remembered.

How do you want history to remember you? For pointing fingers and avoiding blame... or the courage to defend democracy?

This is your last chance to retire with honor before you are blamed for our inevitable apocalypse.

We assume that you want to be seen as a leader and hero. You want to be remembered for your courage - instead of corruption and greed.

These are changes to our election process that ALL voters, historians and future generations will celebrate.

Courage is Doing the Right Thing - when No One Else Will.

Not every act of bravery involves war – some involve refusing to be participate in unethical practices.

The easiest thing to do is nothing. The hardest thing to do is the right thing. Stand up, not because it's popular, but because it's the right thing to do.

Our political system is collapsing. Do you really want to be a member of a party with the lowest approval ratings in our nation's history?

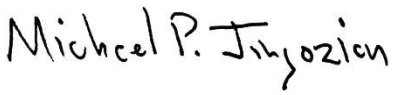

History has no tolerance for those who knew the truth but did nothing.

Real patriotism isn't waving a flag – it's having the spine to fix the country you helped break.

Your choice today will determine whether our children inherit a future worth living in or spend their lives cleaning up your cowardice.

And when history judges you, it won't be fooled by speeches; it will ask one question only: did you do what was right when it mattered, or did you hide?

With Honor and Respect,

Michael Paul Jingozian
Founder, Reset America
On behalf of the American People

PS: If you are a Democrat or Republican member of Congress, then please contact us.

With your leadership, we can return our national back to a true constitutional republic based on fair and equal democratic elections.

That's all any of us want.
